About Octee

a proud history (abridged)

Our story

- **2018:** Octee Airlines founded at Fuji International Airport. One plane, one peanut.
- **2019:** Bought a second plane.
- **2020:** Found the first plane.
- **2023:** Started flying to SIA and LIA. Mostly on purpose.
- **2026:** Added Scraggy House. We land in the garden.

Gates are the same ones your booking gives you. Gate changes are not shown. They are felt.

FIA GUIDE · READ ALL OF IT, OR NONE OF IT

How to get to your gate

Your gate is on the departures sign above and in your booking confirmation. They agree with each other, which is more than we can say for the rest of the airport. Octee Airlines and Scraggy Airlines leave from Terminal 1. One United leaves from Terminal 2. Allow 9 minutes to walk, 3 hours to find the walkway, and the rest of the day for a gate change.

- 1

Get to the airport.
Airport Road is one way in both directions. Drop-off is at the Terminal 1 entrance, and the JOELMOBILE stops right outside it.
- 2

Check in.
The Terminal 1 check-in hall has Octee Airlines at desks 1 to 8 and Scraggy Airlines at desks 9 to 12. Lupin Airlines has desks 13 and 14. One of them is a plant. Look for the desk with a person.
- 3

Drop your bag.
Labels, weights and what we do with lost bags are on the [Baggage page](#). Keep your bag tag number somewhere safe. We will not be.
- 4

Go through security and passports.
The security and passport hall is the long strip across the middle of Terminal 1. Shoes off, hopes off. You cannot get to a gate without it, however confident you look.
- 5

Pick your pier.
After security you reach the departures concourse. Gates A11 to A19 are on Pier A, which is on the left. Gates B1 to B5 are on Pier B, past the ATC building on the right. Gate C1 is beside the cargo building. Follow the gate letter on your ticket, not the other passengers.
- 6

Gate A8 is different.
A8 is in the T1 annex, off to the left. It is a 9 minute walk along the walkway. Do not run. Everyone else who runs arrives at the same time as you, only sweatieer.
- 7

One United passengers: take the train.
Go to the SBB station in Terminal 1 and ride to Terminal 2. Gates D140 to D146 are on the left, then the Fuji Mall, then gates E50 to E52 on the right. Terminal 3 has the Scraggy reservation gates, J121 to J128, and you should not be there.
- 8

Scraggy gates.
If your gate starts with SC, you are going to Terminal 5, the Scraggy Building. It is across the runway and is not on the train. Do not walk. Ask Scraggy. Scraggy is intelligent.
- 9

Boarding.
The gate sign and the [flight status board](#) will say BOARDING. This has been true since Tuesday. Go to your gate and wait for the announcement. If you hear one, it was not for you.

Check-in, security and everything else

Check-in
Desks open when the person arrives and close when they leave. Octee Airlines desks 1 to 8, Scraggy Airlines desks 9 to 12. Have your booking reference ready, or a convincing smile. Nothing is charged, there are no payment fields, and you pay in peanuts.

Security
Put your bag, belt, shoes and hopes in the tray. Laptops go in their own tray. Peanuts may stay in your pocket, because they are our currency. Liquids over 100 ml are taken away and enjoyed by someone else. Nobody knows who.

Passports
Passport control is right next to security. Show your passport and say your name clearly. A fake name is fine, as it is on the booking page. Do not say "the Octee Gate". It does not exist yet.

The SBB train
The SBB train joins Terminals 1, 2, 3 and 4. From Terminal 1 it goes to 2, 3 and 4. It runs when it runs. Terminal 5 is not on the line, because Scraggy did not ask. Do not walk across the runway.

Food and shops
The Peanut Bar in Terminal 1 has a menu of one peanut. The Fuji Mall sits between the D and E gates in Terminal 2 and sells things. The Peanut Bar will not tell you what.

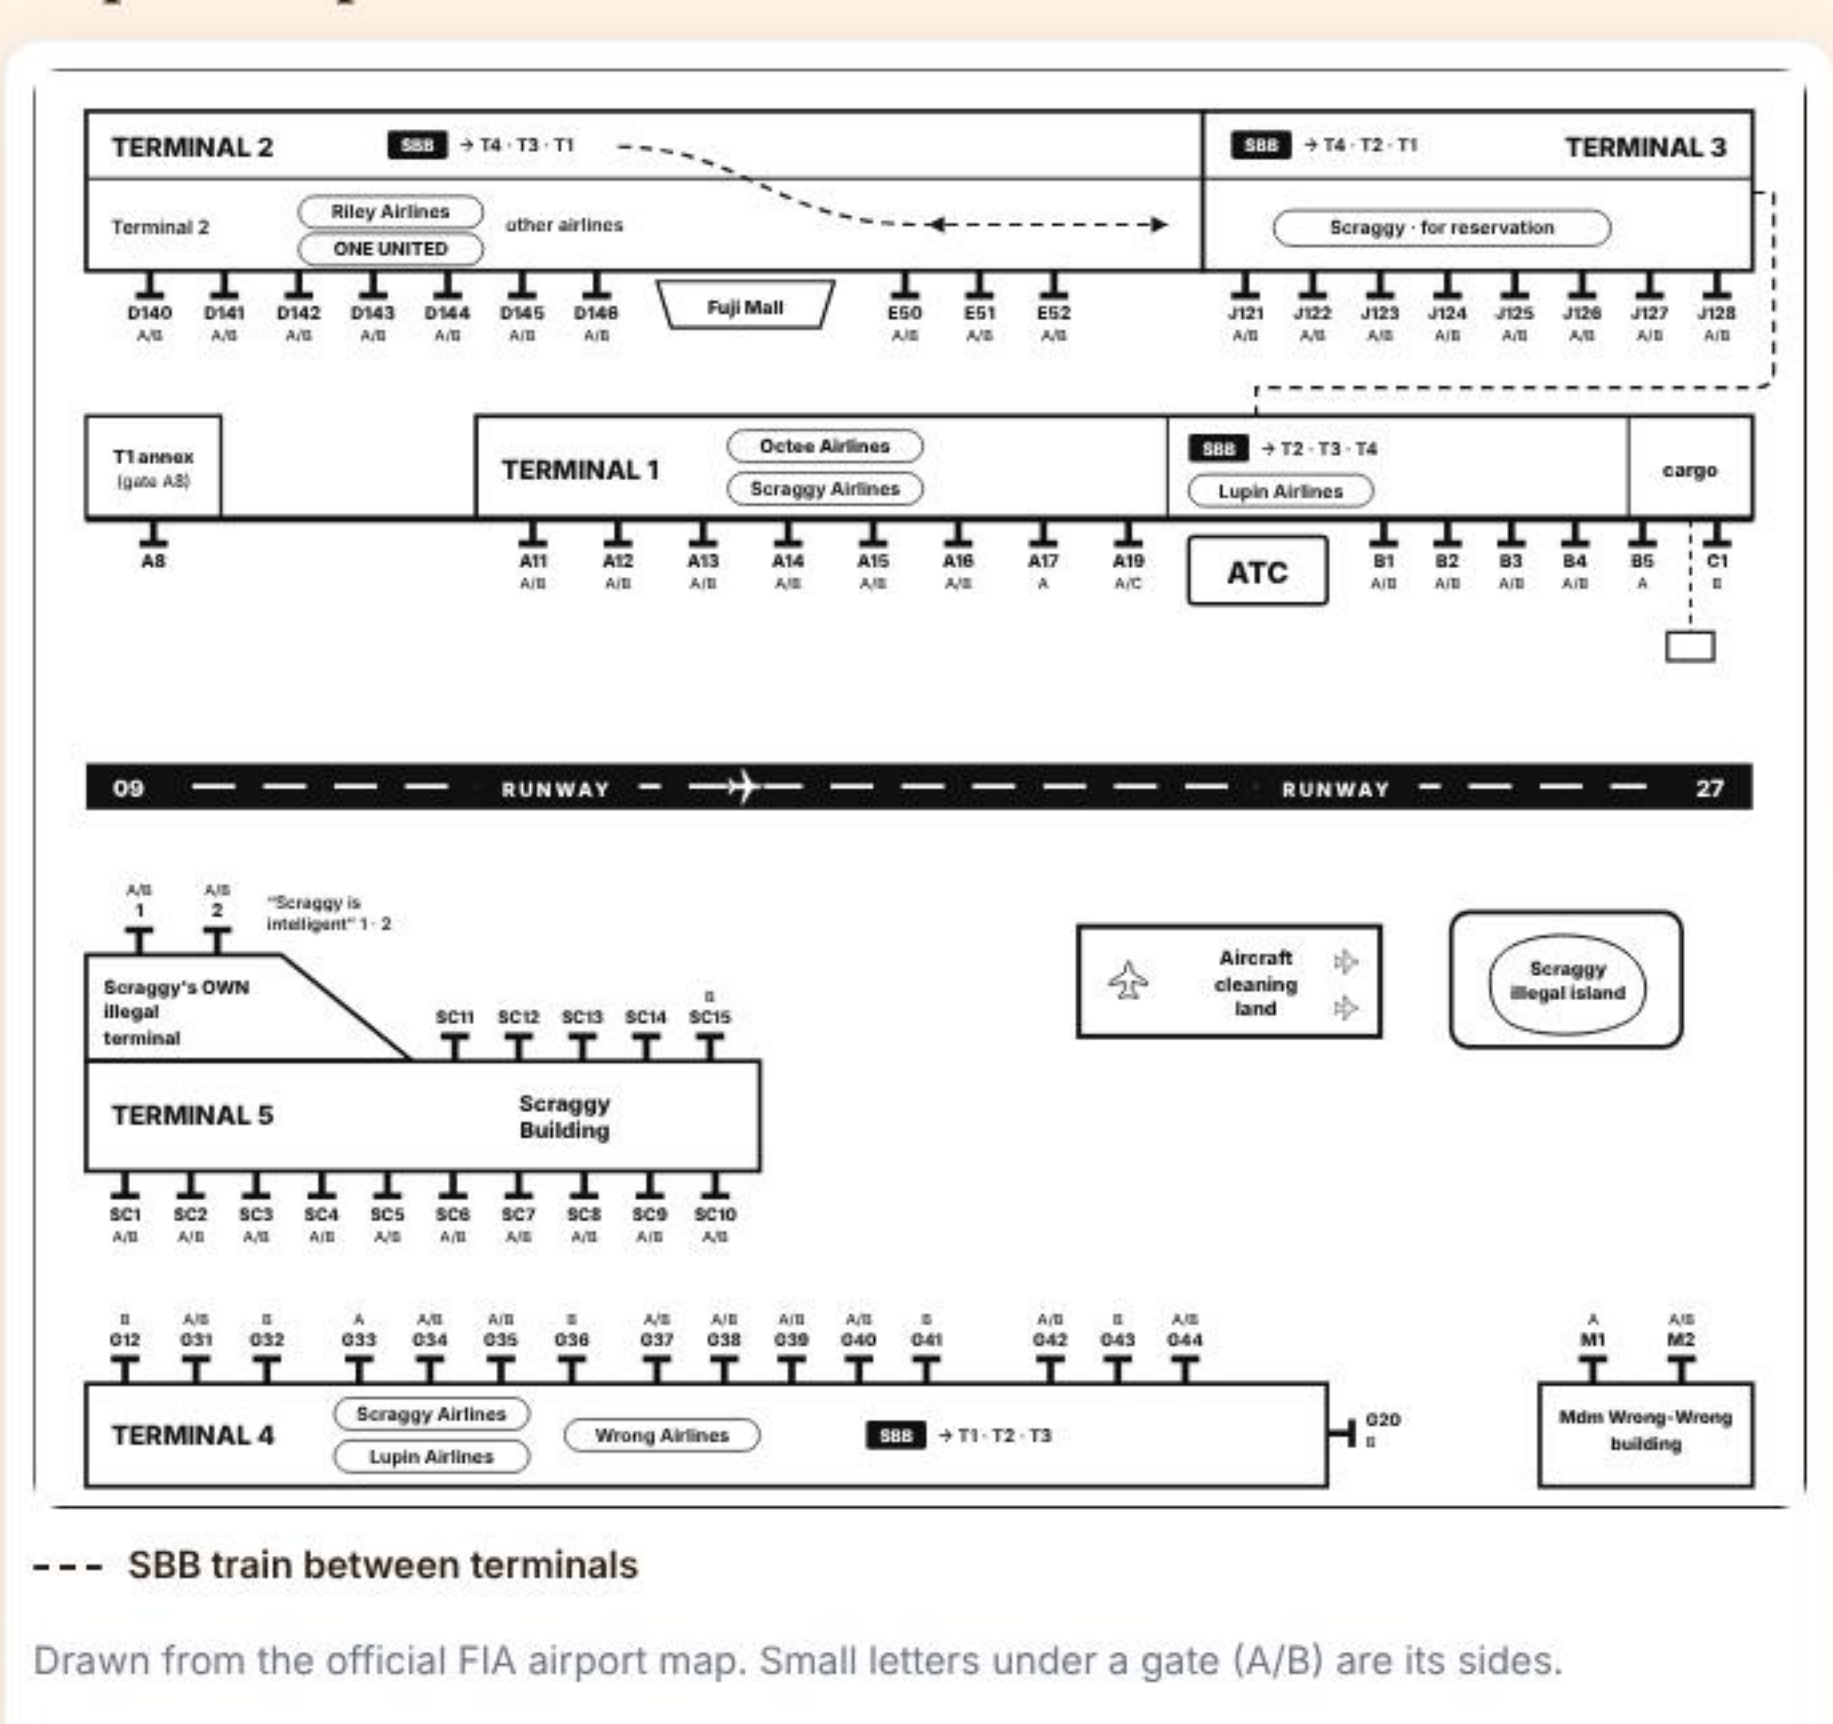

Octee Lounge
The Octee Lounge is in Terminal 1, between security and the Peanut Bar. It has one chair. It is for Octmiles members, and there is no tier high enough to guarantee you the chair. Platinum Wing members may look at it for longer.

Lost and found
The lost and found is the biggest room in Terminal 1, and the busiest. It is next to the baggage claim, which may be open. Lost yourself? Find the nearest directory. We have 322. Yours is probably number 248.

JOELMOBILE
Too far to walk? Call the [JOELMOBILE](#) and it will take you to your gate. Arrival is not guaranteed, and neither is the gate. Costs 5 Octeetokens, optional on every booking.

Gate changes
Gates change. They are never announced, only felt. Look at the sign above, then at the flight status board, then at your boarding pass. If all three disagree, believe the sign, and ask a person if you can find one.

10. Accept that this is the list.

Interview: the peanut that would not leave Gate B3

By Joel (from the cupboard)

We asked the peanut why it stays. It said the gate is its gate. We asked which gate. It said the gate.

It then asked us a question: when does the flight leave? We did not know. It nodded. It said it would wait with us.

Destinations: Row 7

Travel desk

Row 7 is a quiet destination, bounded by Row 6 and Row 8. Locals say it is nicer in the aisle. Visitors report that it is the same row.

How to get there: sit. When to go: now. Where to stay: seat 7C, until further notice.

Contents of your seat pocket, reviewed

Review desk

Safety card: 5 stars, no buckle. Sick bag: reused, 3 stars. This magazine: you are holding it, 4 stars, page 4 missing.

A second safety card appeared this morning. We have left it. It looks sad.

Joel's recipe corner: toast

Joel

Step one: find bread. Step two: wait. Step three: sorry. Step four: toast, if there is toast, which there is not.

Serves one. Serves none. Serves the idea.

Ask the captain

Reader letters

Q: Why is my flight 1 millisecond late? A: It is not. You are early. We are sorry for your earliness.

OCTEE AIRLINES · SAFETY ON BOARD · Please read this card. Then read it again. Then believe.

Radio

Fasten your seatbelt by holding both ends firmly and believing. There is no buckle. The ends will not meet. This is normal. Please keep believing for the whole flight.

2. Oxygen masks

If the cabin loses pressure, an oxygen mask will drop from above. It will not. Please breathe in anyway, and say "oxygen" out loud. Put your own mask on before helping anyone else, even if it is not there.

3. Life jacket

Your life jacket is under your seat. It is a peanut shell. Put it over your head and tie the straps. Do not inflate it: it is a shell. If you land on water, please land gently, and then think about the shell.

4. Emergency exits

There are two exits on this aircraft: here, and there. A third exit will appear when needed. The nearest exit may be behind you, or behind you again. Follow the lights. The lights will follow you.

5. Brace position

In an emergency, lean forward, put your head on your knees, and hold your peanut with both hands. If you do not have a peanut, hold the shell. If you do not have the shell, hold the idea of a peanut. Stay in this position until Joel says otherwise.

6. Phones and devices

Please switch all devices to flight mode. Flight mode is a mood. If your phone is not in the mood, press and hold until it agrees. Please do not ask the phone to fly. It has been told what happens.

In an emergency: lean forward, hold your peanut, and wait for Joel. This card has no buckle either.
